

适用范围: 广泛用于包装、纸箱、印刷、造纸、食品、垃圾回收等行业的压缩打包。

Scope: Widely used for packing industry, cardboard boxes industry, printing industry, paper-making industry, food industry, garbage collection industry.

产品说明 PRODUCT INTRODUCTION

采用两面收口方式，调节方便。

左右压缩及推包，包块长度可调节，连续出包，提高工作效率。

PLC程序，电动按钮控制，操作简单，自带加料检测，自动压缩。

打包长度任意设定，且设有满包提醒装置。

包块尺寸、电压可根据客户的合理要求定制，打包物料不同，包块重量也不同。

三相电压，安全联锁，操作简单，可配风管或输送线上料，效率更高。

Adopts two-side shrinking method, easy to adjust.

It compresses and pushes packets from two sides, the strength of bale can be adjusted, take out bale continuously, improves work efficiency.

PLC control system, operated by electric buttons, with automatic feeding detection, can compress the material automatically.

The bale length can be set, automatic packaging reminder device.

Bale size and voltage could be customized according to customer's requirements, different bale weight depends on different materials.

It has three phase voltage and safety interlock device, simple operation, can connect with air-blower or conveyor line to feed material directly, improving working efficiency.
